TECHNICAL INFORMATION

Category: LED Flood Lights

Application: Ideal for landscape, security and other general-purpose outdoor lighting.

Material: Die-cast aluminum.

Wattage: 10 watt fully sealed LED bulb.

Voltage: 120 volts.

Threaded Stem / Mounting: 1/2 inch NPT threaded stem. Easily mounts to either a weatherproof enclosure or cover with a 1/2 inch knock-out or threaded hub.

Finishes: Available with either a gray, white or bronze powder coat paint finish.

Dimensions: (Housing) 4 in. long, 2-5/8 in. in diameter. (Threaded stem) 2-1/8 in. fully extended.

Certification: c-UL-us Listed

Product Features:

- Rugged die-cast aluminum housing with fully sealed 10 watt LED bulb that is c-UL-us rated for wet locations.
- Produces 800 lumens of light (bright as a 60 watt incandescent bulb or a 20 watt CFL).
- Light appearance: Natural Daylight (5,000 degrees Kelvin)
- Superior powder coat paint finish assures maximum weatherability and scratch resistance.
- With pre-stripped high temperature lead wire; 6 inches in length.
- Adjustable swivel arm with serrated teeth assures positive lamp positioning in the desired direction.

Packaging: Individually packaged and bar coded.

Box Quantity: 4 pcs.
